Full-Stack Software Developer

Full Stack Developer with proven ability to build responsive, high-impact web applications that solve real business problems. Skilled in React, Redux, TypeScript, Python, and SQL, with hands-on experience designing and deploying scalable solutions using modern frameworks and cloud platforms like Firebase. Adept at translating complex requirements into elegant technical solutions, collaborating across teams, and delivering measurable results — including reducing onboarding time by 30% and boosting user engagement by 20%. Passionate about leveraging clean code, modern architectures, and continuous learning to drive innovation and deliver value.

SKILLS:

- ❑ **Languages:** JavaScript, Python, TypeScript, SQL
- ❑ **Tools and Platforms:** Firebase, Github, APIs
- ❑ **Frameworks and Libraries:** React, Redux, Tailwind CSS, Node.js

PROFESSIONAL EXPERIENCE

Freelance Web Developer | Remote | May 2025 – Present

- ❑ Designed and deployed responsive websites and applications for small businesses using React, TypeScript, and CSS, enhancing online visibility and customer engagement.
- ❑ Managed full development lifecycle — from requirements gathering to deployment — ensuring on-time, high-quality delivery.
- ❑ Partnered with clients to iterate quickly on feedback, delivering tailored solutions that improved usability and client satisfaction.

Lead Server | Vic's, Las Vegas, NV | Jan 2023 – Jul 2025

- ❑ Mentored and trained 20+ staff, implementing technology-driven solutions that streamlined team performance.
- ❑ Cultivated strong leadership, communication, and problem-solving skills while thriving in a fast-paced, high-pressure environment.

PROJECTS

Vic's Training App | React, Tailwind CSS, Netlify | github.com/angelicareeves/vics-training

- ❑ Built a multi-page onboarding app with quizzes, flavor scales, and collapsible UI, cutting training time by 30%.
- ❑ Designed a responsive, mobile-first interface to ensure accessibility across devices.

Mauritius Relocation App | React, Tailwind | github.com/angelicareeves/move-to-mauritius

- ❑ Developed an interactive relocation checklist app for digital nomads with dynamic state management.
- ❑ Delivered modular, reusable components to streamline updates and improve scalability.

Storefront Build | React, Firebase | <https://github.com/angelicareeves/firebase-ecommerce>

- ❑ Developed a full-featured ecommerce storefront with product listings, authentication, and real-time database integration using Firebase.
- ❑ Implemented responsive UI and secure data handling to support scalable online transactions.

EDUCATION:

- ❑ Software Engineering Certificate — Coding Temple
- ❑ Frontend & Backend Specializations — Coding Temple
